*The Messy Middle
of Merit-based*

People with a **Scarcity Mentality** have a very difficult time sharing recognition and credit, power or profit... They also have a very hard time being genuinely happy for the successes of other people - even, and sometimes especially, members of their own family or close friends and associates. It's almost as if something is being taken from them when someone else receives special recognition or windfall gain or has remarkable success or achievement.

Although they may verbally express happiness for others' success, inwardly they are eating their hearts out. Their sense of worth comes from being compared, and someone else's success, to some degree, means their failure. Only so many people can be "A" students; only one person can be "number one". To "win" simply means to "beat."

The **Abundance Mentality**, on the other hand, flows out of a deep inner sense of personal worth and security. It is the paradigm that there is plenty out there and enough to spare for everybody.
